

Mentorship

When we join a college we all wish there was someone who could show us around the campus, guide us in academics and tell us about various extracurricular activities in the college. This is precisely what mentorship program is there for. The current second year students will be allotted five freshers each who will guide them during the initial phase of their college life from helping out during admissions, hostel allotment to availability of different necessities and bank requirements, the mentors will render necessary help.

This will especially be beneficial for the parents who come from outside Tamil Nadu and face difficulties in communication and accommodation.

All the students will be contacted the very same day of their admission by the mentors.
