The **International Conference on Research in Engineering, Computers and Technology (ICRECT 2016)** provides a forum for the presentation and discussion of engineering, technology and applied research related to the foundational aspects of computing.

Topics of Interest

With an emphasis on reproducibility and appreciation of theoretical work, the topic areas covered by ICRECT 2016 include, but are not limited to:

- Programming, Algorithms, Data Structures, Software Engineering, Software Agents, OOAD
- Data mining, Big Data Management, Information Processing, Multimedia, Image Processing, Pattern Recognition
- Cloud Computing, Internet of Things, Neural Networks, Heterogeneous Networks, Sensor Networks, Distributed Computing, Virtualization, Web Technology
- Cryptography, Application Security, Network Security, Data Security
- Operating Systems, Multicore Architecture, Green Computing, Fuzzy Logic, Human Computer Interaction, Mobile Computing, Pervasive Computing, Evolutionary Computing, Genetic Algorithms, Swarm Intelligence, PSO, Bio-inspired Algorithms, Autonomic Computing, Parallel Processing
- Applications of IT in Agriculture, Education, Health-care, Community Development, Smart Systems, Transportation, Sanitation, Governance, Manufacturing
