

MASTER OF COMPUTER APPLICATIONS

**SYLLABUS
FOR
CREDIT-BASED CURRICULUM
(Applicable for 2013-2014 onwards)**

**DEPARTMENT OF COMPUTER APPLICATIONS
NATIONAL INSTITUTE OF TECHNOLOGY
TIRUCHIRAPPALLI-620 015
TAMIL NADU - INDIA**

HEAD OF THE DEPARTMENT:

1. Dr.A.Vadivel

MEMBERS OF THE DEPARTMENT:

1. Dr. N.P. Gopalan
2. Dr. A.V. Reddy
3. Dr. B. Ramadoss
4. Dr. Michael Arock
5. Dr. S.Nickolas
6. Dr. S.R.Balasundaram
7. Dr. P.J.A Alphonse
8. Dr. S. Domnic
9. Dr. (Mrs). B.Janet
- 10.Dr. S. Sangeetha
- 11.Dr. R. Eswari
- 12.Dr. U. Srinivasulu Reddy
- 13.Dr.M.P.Anuradha (On Contract)
- 14.Dr.V.Gayathri (On Contract)
- 15.Dr.S.Suresh (On Contract)
16. Dr.R.Siva Shankar (On Contract)

SEMESTER-I

CA711 PROBLEM SOLVING AND PROGRAMMING

Objective:

To learn problem solving methodologies and aspects of C programming.

Introduction to Computers: Block diagram - Hardware and Software components, Programming paradigms, Program Development Cycle, Evolution of Programming languages. Principles of Structured programming - Sequential, selective and repetitive structures -Modular Programming - Functions and Procedures- Parameter passing methods

C Language Fundamentals: Character set - Constants - Keywords - Primitive data types - Declaration - Sequential, selective and repetitive structures

Arrays - Declaration, initialization and accessing array elements - Passing array elements and arrays as arguments - Functions: Definition - call - prototypes - block structure -Storage Classes

Pointers - Address and indirection operators, Pointer type declaration, assignment, initialization - Pointer arithmetic - Functions and pointers - Arrays and pointers -Strings and pointers - Multi-dimensional arrays using pointers - Pointer to arrays - Pointers to functions - Dynamic memory management

Structures - Variables, Accessing members, Assignment and nesting - Pointers to Structures - Structures and functions - Array of Structures - Structures with pointers - Unions - Bitwise operations - Files : operations - Formatted input/output - character input/output - File positioning and Error handling - Pre-processor directives- Command line arguments

REFERENCES:

1. J.R. Hanly and E.B. Koffman, "Problem Solving and Program Design in C", 6th Edition, Pearson Education, 2009.
2. M.A. Vine, "C programming for the absolute beginner", 2nd Edition, Thomson Course Technology,2008.
3. B.A. Forouzan and R.F. Gilberg, "Computer Science: A Structured Programming Approach Using C", 3rd Edition, Thomson Course Technology, 2005
4. B. Gottfried, "Schaum's Outline of Programming with C", 3rd Edition, Tata McGraw Hill,2010.
5. B.W. Kerninghan, D.M. Ritchie, "The C Programming Language", 2nd Edition, PHI,1995

Course Outcome:

Students will be able to:

1. Write structured pseudo codes for a given problem.
2. Write C programs for solving problems.
3. Design programs for complex problems applying the concepts of Arrays and pointers.
4. Design programs for complex problems applying the concepts of structures and files

CA713 MATHEMATICAL FOUNDATIONS OF COMPUTER APPLICATIONS**Objective:**

To learn the mathematical foundations applicable to computing.

Sets - Relations – Posets - Functions - Mathematical Inductions (Simple and strong) – Principles of Counting (Addition & Multiplication)

Graphs - Basic concepts - Isomorphism – complements - Matrix representation of graphs - Trees, Spanning trees, Minimal Spanning tree Algorithms - Euler graphs - Hamiltonian graphs.

Recurrence Relations and Generating Functions - Homogeneous and non-homogeneous recurrences and their solutions - solving recurrences using generating functions

Mathematical Logic – Predicate Calculus – Scope – Binding – Resolution – Regular Grammars

Finite Automata – Context-Free Grammars – Chomsky’s Normal form -Griebach Normal Form - Push-down Automata - Equivalence of CFL’s and PDA’s - Non-context free languages

REFERENCES:

1. Thomas Koshy, “Discrete Mathematics with Applications”, Elsevier,2006.
2. NarsinghDeo, “Graph theory and applications to Engineering and Computer Science”, PHI,1986.
3. Arthur Gill, “Applied Algebra for the Computer Sciences”, Prentice Hall,1976.
4. Michael Sipser, “Introduction to Theory of Computation”, PWS Publishing Co,1996.

Course Outcome:

Students will be able to

- 1.Explain functions and related concepts and illustrate its direct application in Computer languages
2. Solve the problems using the concepts of Graphs, Trees.
3. Deduce complex task by various Mathematical logic.
4. Solve recurrence relations for a given problem.

CA715 COMPUTER ORGANIZATION AND ARCHITECTURE

Objective:

To understand the basic structure of a digital computer and to study the operations of internal components.

Number Systems - Binary Arithmetic - Boolean algebra - Map Simplifications - Gates - Combinational Circuits - Sequential Circuits.

Memory: Internal - External - Memory Organization - Associative - Cache – Virtual memory.

CPU: Arithmetic And Logic Unit - Instruction Sets - RISC - CISC - Instruction pipeline - Addressing modes and formats - Register organization - Control Unit Operation - Processor organization.

External Devices: I/O modules - Programmed I/O - Interrupt Driven I/O - Direct Memory Access - I/O Channels - Asynchronous Data Transfer.

Processors: Parallel – Multi-core – Mobile – Embedded - Cloud computing.

REFERENCES:

1. William Stallings, "Computer Organization and Architecture", 9th Edition, PHI,2012
2. M. Morris Mano, Michael D. Ciletti, "Digital Design", 4th Edition, Pearson Education, 2011.
3. Hennessy J. and Patterson D., "Computer Architecture: A Quantitative Approach", 5th Edition, Morgan Kaufmann, 2011.

Course Outcome:

Students will be able to:

1. Define the Boolean algebra and explain its use in circuit design
2. List the different types of memory and distinguish them.
3. Discriminate the various functional units of CPU and illustrate functioning of I/O devices
4. Explain latest processor technologies and evaluate systems for one's own requirements

CA717 ACCOUNTING AND FINANCIAL MANAGEMENT

Objective:

To learn the fundamentals of accounting and financial management.

Assets – Liabilities – Types - Trading account – Accounting records and Systems – Limitations
- Income statement – Preparation and Interpretation

Depreciation – Methods - Inventory methods, Sources of working capital, Fund flows, Cash
flows – Financial Statement analysis

Ratio analysis - Use of ratios in interpreting Trading Accounts and Financial Statements,
Limitations – Management Accounting

Variable costs – Fixed costs – Cost Volume Profit Analysis – Break even marginal and full
costing contribution, Standard costing - Analysis of variance - Computer accounting and
algorithms

Characteristics of Budgets - Forecasting – Long term, Short term – Methods of capital
investment decision making, Sensitivity Analysis, Cost of capital

REFERENCES:

1. S.N. Maheswari and S.K. Maheswari, “An Introduction to Accountancy”, 8th Edition, Vikas Publishing, 2003.
2. Manmohan and Goyal, “Principles of Management and Accounting”, 5th Edition, SahityaBhawan, 1994.

Course Outcome:

Students will

1. Prepare and analyse the final accounts of the firm
2. Prepare and analyse the funds & cash flow statements of the firm
3. Perform basic analysis of financial statements and write a report on the financial performance, conditions and effectiveness of the firm
4. Analyse and evaluate costing systems
5. Prepare different types of budgets and policies

CA719 PROBABILITY AND STATISTICAL METHODS

Objective:

To learn the fundamentals of probability and statistical methods.

Probability Spaces- Elementary Theorem – Conditional Probability – Independent events – Random variables – Probabilistic modeling

Binomial, Poisson and Normal Distributions – Fitting of Probability distributions – Correlation and Regression – Linear regression – Correlation coefficient – Multiple linear regression

Sampling Distributions & Descriptive Statistics: The Central Limit Theorem, distributions of the sample mean and the sample variance for a normal population, Sampling distributions, problems. Graphical representation, measures of locations and variability.

Estimation : Unbiasedness, consistency, the method of moments and the method of maximum likelihood estimation, confidence intervals for parameters in one sample and two sample problems of normal populations, confidence intervals for proportions, problems.

Test of Hypothesis- Testing for Attributes – Mean of Normal Population – One-tailed and two-tailed tests, F-test and Chi-Square test - ANOVA – One way and two way classifications

REFERENCES:

1. John.E..Freund, Irwin Miller, Marylees Miller “Mathematical Statistics with Applications “, 8th, Prentice Hall of India, 2012
2. Yannis viniotis, “ Probability and Random Processes for electrical engineers”, McGraw-Hill International Edition, 1998
3. Ross, Sheldon. M, “Introduction to Probability and Statistics for Engineers and Scientists”, Academic Press, 2009.

Course Outcome:

Students will be able to

- 1.Explain basic probabilistic and statistical models and illustrate their related applications
- 2.Estimate the likelihood of events from population
- 3.Propose, test and evaluate hypothesis.

CA701 PROGRAMMING IN C LAB

Exercises for learning basic features of C and exercises to solve various numerical methods

Course Outcomes:

Students will be able to:

1. Write C programs for solving any problems.
2. Develop programs for complex problems applying the concepts of Arrays and pointers.
3. Develop programs for complex problems applying the concepts of structures and files.

CA703 BUSINESS COMMUNICATION

Objective:

The Course aims to:

1. Introduce the dynamics of Communication in the Business world.
2. Help to familiarize and practice the different kinds of communication tools.
3. Give practice in the nuances of spoken communication.
4. Expose to the different forms of Business communication.

Communication in the Business World: Communication: Concepts and Goals – Theories of communication – Organizational and personal goals. Psychology of communication – Channels and Networks – Barriers to and cost of communication

Listening and Speaking Practice: Message Planning – Purposive Listening – – Familiarizing to different accents and tones – Listening Practice - Oral Communication – Extempore speech practice – Presentation skills – Group Discussion Practice - Interview skills. Telephone strategies

Writing practice: Business Correspondence – Different kinds of written communication in business Organizations - Marketing Language – Creativity and Appeal – Report writing practice

Technology and Communication: Practice in telephone etiquette – Limitations & possibilities of E mail - Use of Power point- Role of mass media in business communication

REFERENCES:

1. Simon Sweeney, “English for Communication”, 2nd Edition, CUP, 2003
2. Leo Jones and Richard Alexander, “New International Business English”, CUP, 2000.

Course Outcome:

1. Students will be able to communicate in the business world using different communication tools

SEMESTER -II

CA710 DATA STRUCTURES AND APPLICATIONS

Pre Requisite : CA713

Course Objective:

To introduce different data structures; searching and sorting techniques and their applications.

Linear data Structures – Arrays, Structures, Linked Lists – Singly, Doubly, Circular, XOR, VList, Skip, Jump List, Stack: Definition and examples, Representing Stacks - Queues: Definition and examples, priority queue, Deque, IRD, ORD – Applications of Stack, Queue and Linked Lists- Hashing

Non-Linear data Structures - Graphs – Representation – Linked representation of Graphs – Graph Traversals - Binary Trees – Binary Tree Representations – node representation, internal and external nodes, implicit array representation - Operations on binary trees – Binary tree Traversals - Representing Lists as Binary Trees

Advanced data structures –Data structures for disjoint sets- Red-black trees – insertion and deletion – B-trees – Definition, insertion, deletion – Splay tree, Binomial heaps – operations – Geometric data structures: segment trees, range trees, partition trees

Single-source shortest path algorithms – Bellman-Ford algorithm and Dijkstra's algorithm- Transitive closure -Topological sort

Basic sorting techniques – selection sort, bubble sort, insertion sort and merge sort – Basic Search Techniques – linear search and binary search –Search Trees – Tree searching

REFERENCES:

1. S. Lipschutz and G.A.V. Pai, “Data Structures”, Tata McGraw-Hill,2010.
2. M.A.Weiss, “Data Structures and Problem Solving using Java”, 4th Edition, Addison Wesley,2009.
3. P. Brass, “Advanced Data Structures”, Cambridge University Press,2008.
4. M.J.Augestein, Y.Langsam and A.M. Tenenbaum, “Data Structures using Java”, Pearson Education, 2004.
5. R. Kruse and C.L. Tondo, “Data Structures and Program Design in C”, 2nd Edition, Prentice Hall,1996.
6. T.A.Standish, “Data structures, Algorithms and Software principles in C”, Addison Wesley, 1994.

Course Outcome:

Students will be able to

1. Use linear and nonlinear data structures to solve real-time problems
2. Apply basic searching and sorting techniques in different application domains
3. Use design strategies to solve complex problems

CA712 DATABASE MANAGEMENT SYSTEMS

Pre Requisites: CA711,CA713

Objective:

To learn different database models and design of databases and to study query languages and transaction management.

File System versus DBMS – Advantages – Database Languages – ER-Model: Entities – Relationships – Additional Features of ER Model – Conceptual Design with ER Model

Relational Model – Keys - Constraints – Querying – Views - Relational Algebra – Relational Calculus – SQL – QBE

File Organization – Organization of records in files – Indexing – Ordered Indices - B + Tree Index files – Hashing – Static – Dynamic – Query Optimization – Transformation of Relational Expressions – Choice of evaluation plans

Database Design – Pitfalls in Relational Database Design – Functional Dependencies – Decomposition – Normalization – I to V Normal Forms

DB Tuning – Security – Transaction Management – Transactions – Transaction state – Concurrent executions – Serializability – Concurrency Control – Protocols – Crash Recovery

REFERENCES:

1. Raghu Ramakrishnan and Johannes Gehrke, “Data Base Management Systems”, 3rd Edition, McGraw-Hill, 2003.
2. Silberschatz, Korth and Sudarshan, “Data Base System Concepts”, McGraw-Hill, 6th Edition, 2010.
3. C. J. Date, “An Introduction to Database Systems”, 8th Edition, Addison-Wesley, 2003.
4. R. Elmasri, S.B. Navathe, “Fundamentals of Database Systems”, 5th Edition, Pearson Education/Addison Wesley, 2007.

Course Outcome:

Students will be able to:

1. Illustrate the features of DBMS & Models for designing databases
2. Describe the nuances of Data retrieval methods
3. Apply normalization techniques in DB design
4. Perform concurrency and Transaction Management operations

CA714 OPERATING SYSTEMS

Pre Requisite: CA715

Objective:

To introduce basic concepts and features of OS with case study on different operating systems.

Operating System concept- OS Structure –Services-System calls – Process management-Process Concept-Operations on process-Cooperating processes- Inter-process communication-Process scheduling-Scheduling algorithms-Threads- Multithreading models.

Process synchronization- critical-section problem – Synchronization hardware – Semaphores – Classic problems of synchronization – critical regions – Monitors Deadlock-Deadlock characterization – Methods for handling deadlocks – Recovery from deadlock

Memory management-Buddysystem-Paging-segmentation-Virtual Memory –Demand paging-Page replacement algorithms – Allocation of frames – Thrashing-Working set model

Files and Directories - Files System structure- Implementation –File allocation methods-Free space management. I/O systems – I/O interface –Kernel I/O subsystem. Disk scheduling algorithms- Disk management-Swap space management

Protection and security -Case Study-Linux, Windows, Mac OS and Mobile OS

REFERENCES:

1. Silberschatz, Galvin and Gagne, “Operating System Concepts”, 9th Edition, John Wiley & Sons Inc, 2013.
2. Andrew S. Tanenbaum, “Modern Operating Systems” , 3rd Edition, Prentice-Hall of India, 2007
3. SibsankarHaldar, Alex A.Aravind, “Operating systems” , Pearson Education,2009.

Course Outcome:

Students will be able to:

1. Use system calls to interact with OS
2. Synchronize multiple processes and handle issues in synchronization
3. Implement memory management techniques
4. Implement algorithms in secondary storage and file management techniques
5. Design the functionalities of OS

CA716 OBJECT ORIENTED PROGRAMMING

Pre Requisite: CA711

Objective:

To learn the basic principles of object-oriented programming paradigm using C++

Programming Paradigms - Introduction to OOP – Overview of C++ - Classes – Structures – Union – Friend Functions – Friend Classes – Inline functions – Constructors – Destructors – Dynamic Initialization of Objects - Static Members – Passing objects to functions – Function returning objects-Arrays of Objects, Object as Function Arguments

Arrays – Pointers – this pointer – References – Dynamic memory Allocation – functions Overloading – Default arguments – Overloading Constructors – Pointers to Functions – Operator Overloading - Type Conversion

Inheritance – Types - Derived Class Constructors- Issues in Inheritance – Virtual base Class – Polymorphism – Virtual functions – Pure virtual functions

Class templates and generic classes – Function templates and generic functions – Overloading function templates – power of templates – Exception Handling – Derived class Exception – over handling generic functions – Exception handling Functions

Streams – Formatted I/O with IOS class functions and manipulators –File I/O – Name spaces –Array based I/O – Error handling during file operations - Formatted I/O – STL: Overview-Container Classes Lists-Maps- Algorithms Using Functions and Objects-String Class - Sequence Containers, Iterators-Specialized Iterators - Associative Containers. Storing User-Defined Objects - Function Objects

REFERENCES:

1. Stephen Prata, "C++ Primer Plus", 6th Edition ,Addison-Wesley Professional, 2011
2. Bjarne Stroustrup, "Programming: Principles and Practice Using C++,1st Edition, Addison-Wesley Professional, 2008
3. Andrew Koenig and Barbara E. Moo, "Accelerated C++: Practical Programming by Example", 1st Edition, Addison-Wesley Professional, 2000
4. Bruce Eckel , "Thinking in C++: Introduction to Standard C++: Volume One" 2nd Edition,PrenticeHall, 2000
5. Andrei Alexandrescu , "Modern C++ Design: Generic Programming and Design PatternsApplied" , 1st Edition, Addison-Wesley Professional, 2001

Course Outcome:

Students will be able to:

1. Identify classes with attributes and functions for given problem
2. Analyze the relationship between the classes link them using appropriate concepts
3. Design and implement abstract data types.
4. Devise generic classes capable of manipulating primitive and user defined data types.

5. Perform object oriented analysis on the given problem and design a complete system to solve it.

CA718 RESOURCE MANAGEMENT TECHNIQUES

Pre Requisite: CA713

Objective:

To learn different resource management techniques.

One dimensional unconstrained optimization – Fibonacci method – Golden section method – Quadratic approximation method – constrained optimization with Lagrangian multipliers.

Formulation of linear programming problems – Simplex method – Big M method – Two Phase method – Dual Simplex method – Primal Dual problems - Transportation problem – Assignment problem

Dynamic Programming - Formulation – Investment problem – General allocation problem – Stage coach problem – Production scheduling – Reliability problem

Functions of inventories – Deterministic Inventory problems with or without shortage cost – Multi-item deterministic inventory problem – Inventory problem with price breaks – probabilistic models with uniform demand (discrete and continuous cases)

Queuing theory - notation and assumptions – characteristics of queue – Poisson input process – exponential service times – Queuing models – M/M/1 – M/M/C – M/M/1/N – M/M/C/N

REFERENCES:

1. H.A. Taha, “Operations Research: An Introduction”, 8th Edition, Pearson Education, 2008.
2. Swarup.K, Gupta and P.K Man Mohan, “Operations Research”, 14th Edition, Sultan Chand & Sons, 2009.

Course Outcome:

Students will be able to:

1. Formulate and solve LP /NLP /DP Problems
2. Identify appropriate model for given inventory problems and solve the problems
3. Solve queuing problems using queuing models

CA702 DBMS LAB

Pre -requisite: CA 712

Exercises / case studies that require table design, normalization and query building.

Course Outcome

Students will be able to:

1. Design and work in databases, tables
2. Perform normalization and other data base tasks
3. Build complex queries for data retrieval at multilevel

CA704 DATA STRUCTURES LAB

Pre -requisites: CA711,CA713,CA710

Exercises to implement various data structures.

Course Outcome

Students will be able to:

1. Implement linear and nonlinear data structures to solve real-time problems
2. Perform searching and sorting techniques to different application domains
3. Implement different design strategies to solve complex problems

SEMESTER-III

CA721 DATA MINING TECHNIQUES

Pre -requisites: CA712,CA719

Objective:

To introduce concepts of data mining techniques and its applications in knowledge extraction from databases.

Data mining – Motivation – Importance - DM Vs KDD - DM Architecture - Data Types – DM Tasks –DM System Classification - Primitives of DM - Data Mining Query Language - DM Metrics - DM Applications - DM Issues – Social Implications of DM

Data Preprocessing: Summarization - Data cleaning - Data Integration and Transformation - Data Reduction - Discretization and Concept Hierarchy Generation

Mining Frequent Patterns – Frequent Itemset Mining Methods. Classification: Classification by Decision Tree Induction – Bayesian Classification – Rule based Classification - Prediction – Accuracy and Error Measures

Cluster Analysis – Types of Data in Cluster Analysis – Categorization of clustering Methods – Partition Methods - Outlier Analysis – Mining Data Streams – Social Network Analysis – Mining the World Wide Web

Data Warehousing: OLTP Vs OLAP - Multidimensional Data Model -DW Architecture Efficient Processing of OLAP queries - Metadata repository – DWH Implementation - OLAM

REFERENCES:

1. JiaweiHan ,MichelineKamber, "Data Mining: Concepts and Techniques", 2nd Edition, Elsevier India Private Limited,2008.
2. Margaret H. Dunham, "Data Mining: Introductory and Advanced Topics", Pearson Education, 2012.
3. K.P.Soman, ShyamDiwakar, V.Ajay, "Insight into Data Mining Theory & Practice, Prentice Hall India,2012,
4. G.H.Gupta, "Introduction to Data Mining with Case Studies" , 2nd Edition, PHI.

Course Outcome:

Students will be able to:

1. Explain the concepts in data mining and KDD, recognizing issues in Data Mining
2. Practice the preprocessing operations of Data
3. Define the methodologies in Data interpretation, transformation and reduction
4. Perform Association Rule Mining, Classify and Cluster the data sets into groups

CA723 GRAPHICS AND MULTIMEDIA

Pre -requisite: CA710

Objective:

To learn the principles of Graphics Algorithms and Multimedia Techniques

Display Devices – Interactive Input devices – Graphics – Bresenham’s Line Drawing Algorithm – DDA Algorithm – Comparison of Line Drawing Algorithms – Circle Drawing Algorithm

Two-dimensional Transformations – Scan Conversion Algorithms – Windowing – Clipping – Segmenting – Viewport Transformations

3D Concepts - Projections – Parallel Projection - Perspective Projection – Visible Surface Detection Methods - Three-dimensional Transformations –Visualization and polygon rendering - Hidden Surface Elimination Algorithms

Multimedia hardware & software - Components of multimedia – Text, Image – Graphics – Audio – Video – Animation – Authoring. Color models – XYZ-RGB-YIQ-CMY-HSV Models

Multimedia communication systems – Multimedia Information Retrieval – Video conferencing – Virtual reality

REFERENCES:

6. Ralf Steinmetz, KlaraNahrstedt “Multimedia: Computingcommunications& Applications”, Pearson Education, 2001.
7. Ralf Steinmetz, KlaraNahrstedt “Multimedia Computing and Communications and Applications” 11th Impression, Pearson Education, 2012.

Course Outcome:

Students will be able to:

1. Describe the basics of 2D drawing Algorithm and transformations
2. Explain the basics of 3D drawing Algorithm and Transformations
3. Develop interactive animations using multimedia tools
4. Explain multimedia transmission technologies

CA725 SOFTWARE ENGINEERING

Pre -requisites: CA711,CA712,CA716

Objective:

To impart concepts of a comprehensive study on the theories, processes, methods, and techniques of building high-quality software in cost-effective ways.

Introductory concepts – The evolving role of software – Its characteristics, components and applications- A layered technology – the software process – Software process models - Software process and project metrics – Measures, Metrics and Indicators- ethics for software engineers.

Software Project Planning – Project planning objectives – Project estimation – Decomposition techniques – Empirical estimation models - System Engineering- Risk management.

Analysis and Design – Design concept and Principles, Methods for traditional, Real time of object oriented systems – Comparisons – Metrics- Quality assurance

Testing fundamentals – Test case design – White box testing – Basis path testing – Control structure testing – Black box testing – Strategies: Unit testing integration testing – Validation Testing – System testing – Art of debugging – Metrics, Testing tools.

Formal Methods Clean-room Software Engineering – Software reuse – Reengineering – Reverse Engineering – standards for industry

REFERENCES:

1. Rajib Mall, "Fundamentals of Software Engineering", 3rd Edition, PHI, 2009.
2. Roger S. Pressman, "Software Engineering-A practitioner's approach", 6thEdition, McGraw Hill, 2001.

5. James F Peters,WitoldPedryez, "Software Engineering – An Engineering Approach", John Wiley and Sons, 2000.
6. Ali Behforooz, Frederick J Hudson, "Software Engineering Fundamentals", Oxford University Press, 2009.

Course Outcome:

Students will be able to:

1. State the proven principles/techniques/tools, current standards, and best practices of software Engineering.
2. Estimate cost, effort and risk involved in a project
3. Choose a suitable design model for software development
4. Develop a software using formal software engineering approaches
5. Describe the principles of re-engineering and reverse engineering

CA727 COMPUTER NETWORKS

Pre -requisites: CA714,CA711

Objective:

To learn various network architectures and protocols and the functions of different layers in line with IEEE standards.

Building a network – Requirements – Network Architecture – OSI – Internet – Direct Link Networks LAN Technology – LAN Architecture – BUS/Tree – Ring – Star – Ethernet – Token Rings – Wireless Networks

Error Detection and Correction – VRC – LRC - CRC- Checksum – Hamming Distance for Error Correction – simulator development to capture various packets flowing in the Data Link Layer

Switching - Packet Switching – Switching and Forwarding – Bridges and LAN switches – Internetworking – Simple Internetworking – Routing - Selective routing protocol specification

Reliable Byte Stream (TCP) – Simple Demultiplexer (UDP) – TCP Congestion Control – Congestion Avoidance Mechanisms – Streaming Protocol

Domain Name Service (DNS) – Email - SMTP – MIME – HTTP – SNMP-TELNET-FTP

4. James F. Kurose and Keith W. Ross, “Computer Networking - A Top Down Approach”, 5th Edition, Addison Wesley, 2009.
5. Andrew S. Tanenbaum, “Computer Networks”, 5th Edition, Prentice Hall PTR, 2012

Course Outcome:

Students will be able to:

1. List the functionalities of networking layers of both OSI and TCP/IP reference model
2. Explain design issues of DLL and techniques to resolve it
3. Describe the principles of switching and routing algorithms
4. Distinguish TCP and UDP related formats, procedures.

Industrial Component:

Simulator development to capture various packets flowing in the Data Link Layer

CA729 DESIGN AND ANALYSIS OF ALGORITHMS

Pre -requisites: CA710,CA713

Objective:

To learn about Time Complexity and various algorithmic design methodologies.

Algorithms as technology – Analyzing and Designing algorithms – Asymptotic notations – Recurrences – Methods to solve recurrences – Heap Sort - Quick Sort – Sorting in linear time – Radix sort – Selection in linear time.

Divide and conquer methodology – Multiplication of large integers – Strassen's matrix multiplication – Greedy method – Prim's algorithm – Kruskal's algorithm – algorithm for Huffman codes.

Dynamic Programming – Elements – Matrix-chain multiplication –Computing a binomial coefficient – Floyd-Warshall algorithm – Optimal binary search tree – Memory functions.

Backtracking – N-Queens problem – Hamiltonian circuit problem – Subset sum problem – Branch and bound – Assignment problem – Knapsack problem – Traveling salesman problem.

NP-hard and NP-complete problems – Definitions and Properties – Reducibility – Cook's Theorem (without proof) – Clique decision problem – Node cover problem – K-coloring problem

2. Robert Sedgwick and Philippe Flajolet, "An Introduction to the Analysis of Algorithms", 2nd Edition, Addison-Wesley,2013
3. Jon Kleinberg and ÉvaTardos, "Algorithm Design", Addison-Wesley,2005.
4. George T. Heineman, Gary Pollice and Stanley Selkow, "Algorithms in a Nutshell", O'Reilly Media, 2008.
5. SanjoyDasgupta, Christos Papadimitriou and UmeshVazirani,"Algorithms", McGraw-Hill,2006.
6. E.Horowitz, S.Sahni, and S.Rajasekaran, "Computer Algorithms", 2nd edition, Silicon Press,2007.

Course Outcome:

Students will be able to:

1. Analyze the complexity of polynomial algorithms.
2. Apply various design strategies for solving problems
3. Distinguish NP hard and NP complete problems from other problems

CA705 OS AND NETWORKS LAB

Pre-requisites: CA714,CA727

- I. Exercises to learn various commands in operating systems and implement OS algorithms
- II. Exercises to implement network principles

Course Outcome:

Students will be able to:

1. Work with various commands in operating systems.
2. Implement different algorithms in OS
3. Implement various network principles.

CA707 GRAPHICS AND MULTIMEDIA LAB

Pre-requisite: CA 723

Exercises related to:

- Realizing various graphics algorithms
- Implementing Multimedia coding schemes

Course Outcome:

Students will be able to:

1. Implement various graphics algorithms
2. Implement multimedia coding schemas

SEMESTER-IV

CA722 ORGANIZATIONAL BEHAVIOR

Pre-requisite: CA 703

Objective:

To learn the leadership skills and group behavior.

History of Management - The human relations movement - The Hawthorne studies - Models for organizational behavior – Management concepts.

Foundations of Individual Behavior - Personality – Meaning and development - Major determinants of Personality and Values - Theories of Personality – Perception and Individual Decision Making – sensation versus perception - Stress – Causes and effect of job stress - coping strategies for stress.

Foundations of Group Behavior - Understanding Work Teams - Communication - Basic Approaches to Leadership - Contemporary Issues in Leadership – Motivation Concepts - Motivation From Concepts to Applications – Work motivation – Attitude and Job Satisfaction - Power and Politics - Job design - Goal setting

Conflicts - Individual conflict, Interpersonal conflict, Inter-group conflict– Conflict Resolution - Negotiation

Foundations of Organization Structure - Organizational Culture – Organizational Dynamics

REFERENCES:

1. Stephen P. Robbins , Timothy A. Judge, “Organizational Behavior”, 14th Edition, Pearson Education, 2012.
2. Robert Kreitner, Angelo Kinicki, “Organizational Behavior”, 8th Edition, McGraw-Hill, 2007.
3. Fred Luthans, "Organizational Behavior", McGraw Hill, 1997.
4. Keith Davis, "Human behavior at work: Human relations and Organizational Behavior", Tata McGraw Hill, 1982.
5. Rudrabasavaraj M.N. “Dynamic personnel Administration”, 3rd Edition, Himalaya Publishing House, 2011.

Course Outcome:

Students will be able to:

1. Identify their personality type and behavioral pattern
2. Identify the basic skills of leadership
3. Apply the principles of conflict resolution and learn about group behavior
4. Adapt to the organization culture, structure and dynamics

Industrial Component:

A series of tutorials on Organisation development

CA724 INFORMATION SECURITY

Pre-requisite: CA 713

Objective:

To study the concepts and requirements of Information Security.

Information Security - Critical Characteristics of Information, NSTISSC Security Model, Components of an Information System, Securing the Components, Balancing Security and Access, SDLC, Security SDLC

Cryptography: Classical Cryptography, Symmetric Cryptography, Public Key (Asymmetric cryptography), Modern Cryptography. Forensics: DRM technology (including watermarking and fingerprinting of images, video and audio), Steganography, Biometrics

Network Security: Network Protocols, Wireless Security (WiFi, WiMAX,Bluetooth, cell phone), IDS and Network Intrusion Management

Application Security: Email Security, Web Security, and Database Security, Secure Software Development, VoIP Security

Information Security Threats: Viruses, Worms and other malware, Email Threats, Web Threats, RFID, Identity Theft, Data Security Breaches, Hacking Tools and Techniques

REFERENCES:

1. W. Stallings, Cryptography and Network Security: Principles and Practice, 6th Edition, Prentice Hall, 2013
2. Neil Daswani, Christoph Kern, Anita Kesavan, " Foundations of Security: What Every Programme", APRESS, 2007.
3. Michael E Whitman and Herbert J Mattord, "Principles of Information Security", Vikas Publishing House,2003.

Course Outcome:

Students will be able to:

1. Explain the models of information security
2. Apply cryptography techniques to data
3. Simulate the various network security issues
4. Experiment with application security
5. Explore the nature and logic behind the various security threats on the web

Industrial components:

Expert Lecture on Security Related Issues from Ethical Hackers.

CA726 DISTRIBUTED TECHNOLOGY

Pre-requisites: CA727,CA712,CA714

Objective:

To learn the various distributed objects and technologies.

Introduction- Different Forms of Computing- Architecture - Inter-process Communications:IPC Program Interface-Event Synchronization-Timeoutsand Threading- Deadlocks and Timeouts- Data Representation- Data Encoding- Text-Based Protocols- Request-Response Protocols-Event Diagram - Sequence Diagram- Connection-Oriented Vs Connectionless IPC

Client Server: Architecture – Types of Servers – Connection Oriented-Connectionless, Iterative- Concurrent and Stateful Servers. Distributed Computing: Paradigm – Architecture – Application

Socket API and Group Communication:Background-The Socket Metaphor in IPC-The Datagram Socket API-The Stream-Mode- Socket API- Sockets With Non-blocking I/O Operations- Secure Socket API. Group Communication – Unicasting- Multicasting and its types – Java Basic Multicast API - Reliable Multicast API

Distributed Objects : Message Passing Vs Distributed Objects- An Archetypal Distributed Object Architecture- Distributed Object Systems-Remote Procedure Calls- Remote Method Invocation: RMI Architecture, API for Java RMI, Sample RMI Application- Building an RMI Application-Testing and Debugging-Comparison of RMI And Socket APIs

CORBA, COM and Web Services:CORBA Object Interface- Inter-ORB Protocols- Object Servers- Object Clients- CORBA Object References - CORBA Naming Service -Interoperable Naming Service- CORBA Object Services- Object Adapters- Java IDL.Web Services:SOAP-UDDI-WSDL-XML-RESTFUL WEB SERVICE

REFERENCES:

1. M. L. Liu, “Distributed Computing Principles and Applications”, Pearson Education 2004
2. Mark Hansen, “SOA using JAVA Web Services”, Prentice Hall 2007
3. Crichlow, “Distributed Systems: Computing over Networks”, PHI 2009
4. Tanenbaum, Sten, “Distributed Systems - Principles and Paradigms”, PHI 2006
5. Puder, “Distributed Systems Architecture - A Middleware Approach”, Science & TechnologyBooks 2005.
6. Lynch, “Distributed Algorithms” Science & Technology Books 1996.
7. David Reilly & Michael Reilly, “Java Networking and Distributed Computing”, Addison Wesley,2002.
8. Jim Farley, “Java Distributed Computing”, O'Reilly Media; 1st edition, 1998.

Course Outcome:

Students will be able to:

1. Explain the principles and issues in Inter Process Communication
2. Use the concepts of client/server in developing applications
3. Implement IPC applications using sockets
4. Practice the distributed object technologies and use them in developing applications

CA728 OBJECT ORIENTED ANALYSIS AND DESIGN

Pre-requisites: CA716,CA729

Objective:

To learn the concepts of Object Oriented Analysis and Design; exposing the development of OOAD based applications.

Object Model – Evolution, Elements – Nature of Classes and Objects – Relationships among Classes - Classification – Identification of classes and objects – Key abstractions and mechanisms – Basic and Advanced Modeling techniques.

Methodology – Modeling and UML – Rumbaugh’s Method – Booch Method – Jacobson et al Method – Comparisons – UML – Static-Dynamic Models – Diagrams –Use Cases.

Process of design, design principles, architectural patterns, design document, difficulties and risks in design - Frameworks: reusable subsystem. Design patterns – Singleton, observer, adapter, Façade, proxy with examples. - Pattern Categories - Relationships between patterns - Pattern descriptions – Patterns based Applications – Object Oriented Database

Java - Features – Structure – Elements of Java – Array, String, String Buffer, Vectors –Methods – Object Oriented Features- Classes, Objects – Constructors – Package – Inheritance – Interface – Abstract Class - Special types of classes.

Applet Programming – AWT – Graphics - Event Handling – Exception Handling – Utilities and Collections – I/O Streams - Multithreaded Programming - Swings - J2EE Architecture

REFERENCES:

1. Grady Booch et al, “Object-Oriented Analysis and Design with Applications”, 3rd Edition, Pearson Education, 2007.
2. Michael Blaha and James Rumbaugh, “Object-Oriented Modeling and Design with UML”, 2nd Edition, Pearson Education,2005
3. PatricNaughton , Herbert Schildt, "Java 2 Complete Reference", Tata McGraw Hill, 1999.
4. Joshua Bloch, “Effective Java”, Addison-Wesley; 2nd Edition, 2008

5. Bruce Eckel, "Thinking in Java", Prentice Hall; 4th Edition, 2006
6. Erich Gamma, Richard Helm, Ralph Johnson & John Vlissides, "Design Patterns: Elements of Reusable Object-oriented Software", Pearson Education India, 2004.

Course Outcome:

Students will be able to:

1. Define the fundamentals of OO approach
2. Design OO Application using design patterns.
3. Solve real world problems by applying OOAD principle
4. Acquire expertise in Java Programming

CA706 DISTRIBUTED TECHNOLOGY LAB**Pre-requisite: CA 726**

- Simple Client and Echo Server Example.
- Graphical Client and Multithreaded Echo Server.
- Synchronization with shared data and threads
- Broadcasting and Multicasting
- Sending and Receiving Objects (Object Serialization)
- Database Communications
- Java RMI
- Any Middleware Application

Course outcomes:

Student will be able to implement

1. Graphical Client and Multimedia Eco Server
2. Synchronization with shared data and threads
3. Sending and Receiving Objects (Object Serialization)
4. Middleware Applications

CA708 INFORMATION SECURITY LAB

Pre-requisite: CA 724

Exercises to learn information security related programming.

Course Outcome

Students will be able to :

1. Implement cryptography techniques to data
2. Simulate the various network security issues
3. Experiment with application security
4. Explore the nature and logic behind the various security threats on the web

SEMESTER-V

CA731 WEB TECHNOLOGY

Pre-requisites: CA716,CA726

Objective:

To learn the concepts web technologies; develop and deploy effective web applications;

Web essentials – W3C - clients – servers - communication – markup languages – XHTML – simple XHTML pages style sheets – CSS

Client side programming – Java script language – java script objects – host objects Browsers and the DOM

Server side programming – Java servlets – basics – simple program – separating programming and presentation – ASP/JSP - JSP basics ASP/JSP objects – simple ASP/JSP pages.

Representing Web data – data base connectivity – JDBC – Dynamic Web pages – XML – DTD – XML schema – DOM – SAX – XQuery - Building Web applications - cookies – sessions – open source environment – PHP – MYSQL –case studies.

Middleware Technologies – Ecommerce – Architectures – Technologies – Ajax – Advanced Web Technologies and Tools.

REFERENCES:

1. Jeffrey C Jackson, “Web Technology – A computer Science perspective”, Persoson Education, 2007.
2. Chris Bates, “Web Programming – Building Internet Applications, “Wiley India, 2006.

Course Outcome:

Students will be able to :

1. Develop client side and server side applications.
2. Design and develop enterprise applications
3. List the various middleware technologies and use them to develop applications.

CA733 CLOUD COMPUTING

Pre-requisites: CA714,CA727,CA726

Objective:

To learn the various concept of Distributed and Cloud computing and to study the Architecture and service models in Cloud computing.

Distributed Systems Models and Enabling Technologies: Scalable Computing – Technologies for Network-Based Systems – System Models for Distributed and Cloud Computing – Software Environments for Distributed and Clouds – Performance, Security and Energy Efficiency

Virtualization concepts: Implementation Levels of Virtualization – Virtualization Structures - Tools and Mechanisms – Virtualization of CPU, Memory and I/O Devices – Virtual Clusters and Resource Management – Virtualization for Data-Center Automation, Introduction to Various Virtualization OS - Vmware , KVM, Xen.

Service-Oriented Architecture for Distributed Computing: Services and SOA – Message-Oriented Middleware – Portals and Science Gateways – Discovery-Registries-Metadata - Workflow in SOA

Cloud Computing and Service Models – Data-center Design and Interconnection Networks – Architectural Design of Compute and Storage Clouds – Public cloud Platforms – Inter-cloud Resource Management – Cloud Security and Trust Management

Cloud Programming and Software Environments – Features of Cloud and Grid Platforms – Parallel and Distributed Paradigms – Programming Support of Google App Engine – Amazon AWS and Microsoft Azure - Emerging Cloud Software Environments

REFERENCES:

1. Kai Hwang, Geoffrey C.Fox, and Jack J. Dongarra, "Distributed and Cloud Computing", Elsevier India Private Limited, 2012.
2. Foster and Kesselman, "The Grid : Blueprint for a New Computing Infrastructure", Morgan Kauffman publishers Inc.2004
3. Coulouris, Dollimore and Kindber, "Distributed System: Concept and Design", Fifth Edition, Addison Wesley, 2011.
4. Michael Miller, "Cloud Computing", Dorling Kindersley India,2009.
5. Anthony T. Velte, Toby J. Velte and Robert Elsenpeter, "Cloud computing: A practical Approach", McGraw Hill,2010.

Course Outcome:

Students will be able to:

1. Acquire Knowledge on the features and development of Cloud Computing.
2. Define the principles of virtualization
3. Use various performance criteria to evaluate the quality of the cloud architecture
4. Identify the Service-Oriented Architecture for Distributed Computing workflow.

Industrial components:

Expert Lecture on current advancement in cloud and cloud support models.

CA709 WEB TECHNOLOGY LAB

Pre-requisite: CA 731

Exercises / case studies on HTML, XML, PHP, JSP etc. – Designing web portals

Course Outcome

With HTML, XML, PHP, JSP, students will be able to

1. Develop client side and server side applications.
2. Design and develop enterprise applications
3. Implement the various middleware technologies and use them to develop applications.

CA749 MINI PROJECT WORK

Pre-requisites: CA711,CA712,CA725

Course Outcome:

Students will be able to

1. Identify the problem related to the project work
2. Implement the case studies using the concepts and techniques in the curriculum

CA750 PROJECT WORK

Pre-requisites: CA711,CA712,CA725

6 Months internal/external project work with submission of project work and viva-voce examination

Course Outcome

Students will be able to

1. Implement the solution for the chosen problem using the concepts and techniques in the curriculum
2. Record the research to the development process of a particular problem

ELECTIVES -A

CA7A1 BUSINESS INTELLIGENCE

Pre-requisite: CA721

Objective:

To know the BI as expert information, knowledge and technologies efficient in the management of organizational and individual business.

Decision Support and Business intelligence - Changing Business environments and computerized decision support, managerial decision making and support for decision making - DSS concept and framework Business intelligence - Major tools and techniques of managerial decision support - BI architectures

Essentials of Business Intelligence-Origins and drivers of business intelligence, successful BI implementation, characteristics of BI-Architecting the Data, Enterprise Data Model and its Benefits, Granularity of Data in Data Warehouse and Role of Metadata

Advanced Data Warehousing principles- Data warehousing architectures, DW development, real time DW and DW Administration and security issues-Visualization of Dimension model-Star, snowflake and other advanced models-Aggregated Fact tables -Relational DBMS Support for Dimensional Modeling- Advanced Topics in Dimensional Modeling - Selecting a Modeling Tool - Populating Data Warehouse

Dimensional modeling in BI environment - Dimensional Modeling - Modeling considerations -Dimensional model design life cycle - Case studies - Business Analytics and data Visualization - Business analytics overview, reports and queries, Advanced business analytics, data visualization, Real time BI, Business analytics and web intelligence - Structure of mathematical models for decision support and visual interactive simulation

Business performance Management - Business Intelligence Applications: Marketing models, Logistic and production models and Data Development analysis.

REFERENCES:

1. E Turban, J E Aronson, Teng Pend Liang and Ramesh Sharda, "Decision Support and Business Intelligence Systems", 8th Edition, Pearson Education, 2009.
2. Dan Volitich, "IBM Cognos Business Intelligence", TMH,2008
3. Chuck Ballard, Dirk Herreman, Don Schau, Rhonda Bell,Eunsaeng Kim, Ann Valencic, "Data Modeling Techniques for Data Warehousing", IBM Corporation, 1999

Course Outcome:

Students will be able to :

1. Explain the concepts of decision support and framework for Business Intelligence
2. Identify the practical implications and functions of BI

3. Design & construct data mart and data warehouse
4. Describe dimensional modelling and analytics involved in BI

CA7A2 UNIX AND SHELL PROGRAMMING

Pre-requisite: CA714

Objective:

To learn the UNIX operating system concepts and shell programming

Introduction – UNIX Environment –Structure – Accessing UNIX –Common Commands – Basic Editors: Concepts –Modes –Editor Commands

File Systems: File names –File Types –Regular Files –Directories –File System Implementation -Operations Unique to directories and regular files –Security and File Permission

Introduction to Shells: UNIX Session –Standard Streams –Redirection –Pipes –Command Line Editing –Job Control – Aliases –Variables -Shell/Environment Customization

Filters: Concatenating –Sorting –Translating Characters – Duplicate Lines –Character Count –Comparing Files. Communications: User commands –Electronic mail –Remote Access – File Transfer

C Shell Programming: Basic Scripts –Expressions –Decision Making Selections –Special Parameters –Argument Validation –Debugging Scripts –Signals –Scripting Techniques

REFERENCES:

1. Behrouz A. Forouzan, Richard F. Gilberg, “UNIX and Shell Programming “ , 9th Edition, Cengage Learning, 2009.
2. SumitabhaDas,“UNIX Concepts and Applications”,8th Edition, Tata McGraw Hill, 2008
3. M G Venkateshmurthy: UNIX and Shell Programming, Pearson Education, 2005
4. Maurice J. Bach, “The Design of the Unix Operating System”, Indian Edition, PHI Learning Private Limited, 2011.

Course Outcome:

Students will be able to :

1. Explain the concepts of UNIX Operating System
2. Use various file and directory commands in UNIX Operating System
3. Write shell scripts for various tasks

CA7A3 VISUAL PROGRAMMING

Pre-requisite: CA716

Objective:

Understand the principles of graphical user interface design and develop desktop applications and web services using .NET

.NET Framework - Architecture, Common Language Runtime, Common Type System, Namespaces, Assemblies, Memory Management, Process Management, Class Libraries.

Visual programming principles – GUI Design - User-centered Design - Navigation - Accessibility - Structure – Elements- Visual hierarchy – Typography – Graphics – Animation – Creative design.

.NET - Declaration, Expression, Control Structures, Function, String, Array, Encapsulation, Class, Property, Indexer, Delegate, Inheritance, Interface, Polymorphism, Exception Handling, Modules, Graphics, File handling and Data Access.

.NET – Form- Event-Form Controls – Containers – Menus - Data controls - Printing – Reporting – Dialogs – Components - Single and Multiple Document Interfaces.

ASP.NET – Web Pages, Web Forms, Web Site Design, DataControls, ValidationControls, HTML, NavigationControls, LoginControls, Reports - Master Pages – Web Service Architecture - Basic Web Services – Web Reference – Standards.

REFERENCES:

1. Matt J. Crouch, “ASP.NET and VB. NET Web Programming”, Pearson Education, 2006.
2. Kevin Hoffman, “Microsoft Visual C# 2005 Unleashed”, Pearson Education, 2006
3. SandeepChatterjee, Janes Webber, “Developing Enterprise Web Services: An Architect’s Guide”, Pearson Education, 2005
4. Wilbert O. Galitz, “The Essential Guide to User Interface Design: An Introduction to GUI Design Principles and Techniques”, Wiley Desktop Editions, 2007.

Course Outcome:

Students will be able to :

1. Define the basics of .NET framework
2. Use components in .NET to solve various application related problems
3. Design and develop web applications with ASP.NET

Industrial Component:

A series of lectures on the latest trends and technology

CA7A4 SOFTWARE ARCHITECTURE AND PROJECT MANAGEMENT

Pre-requisite: CA725

Objective:

To know the issues related to the design of complex software and to learn the project management concepts and the use of tools.

Software components - COTS and infrastructure - Software variability management-
Software architecture design methods - Architecture evaluation and assessment methods -
architectural styles

Design Patterns - Evolution patterns - Software artifact evolution processes - Case studies -
Java Beans

Product, Process and Project – Definition – Product Life Cycle – Project Life Cycle Models

Format Process Models And Their Use -Definition and Format model for a process – The ISO
9001 and CMM Models and their relevance to Project Management –Emerging Models -
People CMM-Metrics – Configuration Management – Software Quality Assurance – Risk
Analysis

Engineering and People Issues in Project Management-Phases (Requirements, Design,
Development, Testing, Maintenance, Deployment) –Engineering Activities and Management
Issues in Each Phase – Special Considerations in Project Management for India and
Geographical Distribution Issues

RERERENCES:

1. Len Bass, Paul Clements, and Rick Kazman, "Software Architecture in Practice", 2nd Edition, Addison-Wesley Longman, Inc., Reading, MA, 2003
2. Richard N.Taylor, NenadMedvidovic, and Eric M.Dashofy, "Software Architecture: Foundations, Theory and Practice", Wiley India Edition, 2012
3. Mary Shaw, and David Garlan ,” Software Architecture in Practice: Perspectives on an Emerging Discipline", PHI Learning Private Limited,2010

4. Ramesh and Gopaldaswamy, "Managing Global Projects", Tata McGraw Hill,2001

Course Outcome:

Students will be able to :

1. Explain various design and evaluation methods
2. Employ design patterns in the software architecture
3. Apply various phases of life cycle models
4. List various process models and describe issues related with quality assurance
5. Apply engineering activities involved in various project management phases

Industrial Component

Presentation of Case studies on the design & development of complex software and current practices of successful project management activities by practicing professionals from leading industries

CA7A5 BUSINESS ETHICS

Pre-requisite: CA722

Objective:

To introduce business ethics and its practices.

Introduction to Business Ethics, Ethics, Morals and Values, Concepts of Utilitarianism and Universalism – Theory of rights, theory of Justice – Virtue ethics – ethics of care– Law and Ethics – The Nature of Ethics in management – Business Standards and Values – Value Orientation of the Firm

Environmental Pollution and Society - Marketing Ethics (in Products, Pricing, Promotion and Place) and Consumer protection – Ethics in Human Resources management (Recruitment and promotion policies, Working Conditions, Down Sizing Workforce), Ethical issues at the top management, Ethics in financial markets and investor protection – Ethical responsibility towards competitors and business partners

A Historical Perspective from Industrial Revolution to Social Activism – Current CSR practices of the firms in India and abroad. Conflicts in decision making from ethical and economic point of view - Ethical Dilemma - Solving ethical dilemma -Managerial integrity and decision making

Personal Integrity and self-development – wisdom based leadership.

History of Corporate form and models - Corporate Objective and goals, Ownership pattern – Issues in managing public limited firms – Agency problems

REFERENCES:

1. M. G. Velasquez, “Business Ethics: Concepts and Cases”, 2005, Prentice Hall of India.
2. N. Minow and R. Monks, “Corporate Governance”, Wiley-Blackwell, 2008
3. E. Banks, “Corporate Governance: Financial Responsibility, Ethics and Controls”, 2004, Palgrave Macmillan, 2004
4. Laura P. Hartman & Joe DesJardins, Business Ethics: Decision-Making for Personal Integrity and Social Responsibility, NY: McGraw-Hill/Irwin, 2008.

Course Outcome:

Students will be able to :

1. Define the principles of ethics and morals of business
2. Convey ethical response with respect to Competitors & Business Partners
3. Enhance the leadership skills with respect to decision making & business management

ELECTIVES -B

CA7B1GREEN COMPUTING

Pre-requisites: CA715,CA731

Objective:

To introduce green computing in the ICT environments.

Importance of Green IT: The Growing Significance of Green IT and Green Data Centers -All Basic Steps towards Green IT - The Basics of Green IT

Collaboration is Key for Green IT - The Government’s Role - Regulation and EPA Activity - : Regulating Greenhouse Gases - Role of the EPA -IT Company Support of Government Regulation -Educational Institutions and Government Regulation

Magic of Incentive - The Role of Electric Utilities - A Most-Significant Step - "Virtualizing" ITSystems: Consolidation and Virtualization - Data Storage

Need for Standard IT Energy-Use Metrics: SPEC -EPA- LEED- Green Grid Data Center Power-Efficiency Metrics: PUE and DciE. Data Center - Strategies for Increasing Data Center -

Cooling Efficiency - Fuel Cells for Data Center Electricity - Emerging Technologies for Data Centers.

Web, Temporal And Spatial Data Mining Green IT Case Studies for Energy Utilities - Green IT Case Studies for Universities and a Large Company - Worldwide Green IT - Case Studies - The Future of Green IT for Corporations.

REFERENCES:

1. John Lamb, "The Greening of IT-How Companies Can Make a Difference for the Environment", IBM Press 2009
2. Frederic P. Miller, Agnes F. Vandome, John McBrewster, "Green Computing", Alpha script publishing,

Course Outcome:

Students will be able to :

1. Deduce the need and basics of Green IT
2. Compare the collaborative effort of various agencies for the effectiveness of the Green IT
3. State the need for virtualization and its impact
4. List and categorize various IT energy-use metrics
5. Use Green IT in various areas and the future needs and trends.

CA7B2 IMAGE PROCESSING

Pre-requisite: CA723

Objective:

To understand the fundamental algorithms in image processing and to gain experience in applying image processing algorithms to real time problems.

Digital image fundamentals- Image Representation – Sampling and Quantization – Relationships between pixels – Imaging Geometry- Image transforms – Fourier- Discrete Fourier-Fast Fourier- Discrete Cosine- Walsh- Hadamard -Haar -Slant – Karhunen – LoeveTransforms

Spatial Domain methods: Basic grey level transformation – Histogram equalization – Image subtraction – Image averaging –Smoothing and Sharpening: Spatial filters –Frequency Domain methods: Smoothing and Sharpening Frequency domain filters

Model of Image Degradation/restoration process – Noise models – Spatial filtering -Inverse filtering -Least mean square filtering – Constrained least mean square filtering – Geometric mean filter

Lossless compression: Variable length coding – LZW coding – Bit plane coding- predictive coding-DPCM-Lossy Compression: Transform coding – Wavelet coding – Basics of Image compression standards: JPEG, MPEG, Basics of Vector quantization

Edge detection – Thresholding – Region-based segmentation – Boundary representation: chain codes- Polygonal approximation – Boundary segments – boundary descriptors: Simple descriptors-Fourier descriptors - Regional descriptors –Simple descriptors- Texture

REFERENCES:

1. R. Gonzalez and R. E. Wood, “Digital Image Processing”, 3rd Edition, Pearson Education, India, 2008.
2. A.K. Jain, “Fundamentals of Digital Image Processing”, PHI,2010
3. Kenneth R. Castleman, Digital Image Processing, 2nd Edition, Pearson, 2006.
4. Rafael C. Gonzalez, Richard E. Woods, Steven Eddins,' Digital Image Processing using MATLAB', Pearson Education, Inc., 2004.
5. D,E. Dudgeon and RM. Mersereau, , 'Multidimensional Digital Signal Processing', Prentice Hall Professional Technical Reference, 1990.
6. William K. Pratt, , 'Digital Image Processing' , John Wiley, 3rd Edition ,New York, 2008

Course Outcome:

Students will be able to :

1. Explain the fundamental concepts of digital image processing
2. Distinguish the processing of image in spatial & frequency domains
3. List and illustrate the various models that involved in image processing
4. Use the compression standards & implement various compression techniques

CA7B3 SOFTWARE AGENTS

Pre-requisite: CA7A4

Objective:

To learn the concepts (basic to advanced levels) of agent technologies and their applications in developing complex software systems

Agent and user experience: Interacting with Agents - Agent from Direct Manipulation to Delegation - Interface Agent Metaphor with Character - Designing Agents - Direct Manipulation versus Agent Path to Predictable

Agents for Learning in Intelligent Assistance: Agents for Information Sharing and Coordination - Agents that Reduce Work Information Overhead - Agents without Programming Language - Life like Computer character - S/W Agents for cooperative Learning - Architecture of Intelligent Agents

Agent communication and collaboration: Overview of Agent Oriented Programming - Agent Communication Language - Agent Based Framework of Interoperability

Agent Architecture: Agents for Information Gathering - Open Agent Architecture - Communicative Action for Artificial Agent

Mobile agents and advanced concepts: Mobile Agent Paradigm - Mobile Agent Concepts - Mobile Agent Technology - Case Study: Tele Script, Agent Tel – Emerging Agent Technologies.

REFERENCES:

1. Jeffrey M. Bradshaw, "Software Agents", MIT Press, 2000.
2. William R. Cockayne, Michael Zyda, "Mobile Agents", Prentice Hall, 1998
3. Russel & Norvig, "Artificial Intelligence: A Modern Approach", Prentice Hall, 2nd Edition, 2002
4. Joseph P. Bigus & Jennifer Bigus, "Constructing Intelligent agents with Java: A Programmer's Guide to Smarter Applications", Wiley, 1997.

Course Outcome:

Students will be able to :

1. Define the concepts and issues of agent technology
2. Explain the architecture of agent technology
3. Describe communication processes involved in agent technology
4. Apply the concepts of mobile agents.

CA7B4 MARKETING MANAGEMENT

Pre-requisites: CA717, CA722

Objective:

To facilitate understanding of the conceptual framework of marketing and its applications in decision making under various environmental constraints.

Introduction to marketing, scope of marketing , core marketing concepts, new marketing realities, production concept, product concept, selling concept, marketing concept, Relationship Marketing, Integrated Marketing ,Performance Marketing, new 4P's

Buying Behaviour: key psychological process, buying decision process, stages in buying process. Bases for Segmenting: Consumer, Business Markets, Market Targeting, Positioning

Product : Levels , hierarchy , Classification of products, Major product decisions, Product line and product mix; Branding, brand equity, Product life cycle – strategic implications, New product development and consumer adoption process. Pricing: Objective of pricing decision, factors affecting price determination, pricing policies, developing pricing strategies, strategies for new products and existing products

Promotion :Communication Process; Promotion mix – advertising, personal selling, sales promotion, publicity and public relations, direct marketing ; Determining advertising budget; Copy designing and testing; Media selection; Advertising effectiveness; Sales promotion – tools and techniques

Market control: Annual plan control, sales analysis market share analysis, profitability control, marketing profitability analysis, efficiency control and strategic control. Trends in marketing, socially responsible marketing, internal marketing, green marketing, cause marketing, cause related marketing

REFERENCES:

1. Philip Kotler, "Marketing Management", 14th Edition, Pearson Prentice Hall, 2011
2. Ramaswamy V.S and Namakumari .S," Marketing Management: Planning, implementation and control", 2nd Edition, Macmillan, New Delhi, 1997
3. Michael J. Etzel, Bruce J. Walker, William J. Stanton, Ajay Pandit, "marketing – concepts and cases", special Indian edition, McGraw Hill
4. Zikmund d Amico, "The power of Marketing" , 7th edition, South Western , Thomson Learning Publications, 2006.

Course Outcome:

Students will be able to :

1. Define the fundamentals of marketing
2. List the issues related to buying and target marketing
3. Apply the new product development strategies
4. Use product promotional techniques
5. Familiar with trends in analysis & control in marketing

CA7B5 SOFT COMPUTING

Pre-requisites:CA710, CA719

Objective:

- To introduce the techniques of soft computing
- To explain the hybridization of soft computing systems which differ from conventional AI and computing in terms of its tolerance to imprecision and uncertainty.

Soft Computing and its Techniques, Soft Computing verses Hard Computing. Applications of Soft Computing in the current industry

Neural Network (NN), Biological foundation of Neural Network, Neural Model and Network Architectures, Perceptron Learning, Supervised Hebbian Learning, Back-propagation, Associative Learning, Competitive Networks, Hopfield Network, Computing with Neural Nets and applications of Neural Network

Fuzzy Sets, Operations on Fuzzy sets, Fuzzy Relations, Fuzzy Measures, Applications of Fuzzy Set Theory to different branches of Science and Engineering

NeuroFuzzy and Soft Computing, Adaptive Neuro-Fuzzy Inference System Architecture, Hybrid Learning Algorithm, Learning Methods that Cross-fertilize ANFIS and RBFN

Coactive Neuro Fuzzy Modeling, Framework Neuron Functions for Adaptive Networks, Neuro Fuzzy Spectrum. Hybridization of other techniques

REFERENCES:

2. J. Freeman and D. Skapura,Neural Networks: Algorithms, Applications, and Programming Techniques, Addison-Wesley,1991
3. G. J. Klir, and B. Yuan,Fuzzy Sets and Fuzzy Logic: Theory and Applications, Prentice-Hall,1995
4. S. Rajasekaran and G.A.V.Pai,Neural Networks, Fuzzy Logic and Genetic Algorithms, PHI,2003

Course Outcome:

Students will be able to :

1. Explain the basics of soft computing and their suitable industry related applications
2. Apply neural network principles and algorithms for given problems
3. Apply the principles of fuzzy algorithms for real time applications

Industrial Component:

A series of tutorials on MATLAB.

CA7B6 ADVANCED DATABASE TECHNOLOGY

Pre-requisites: CA712,CA721

Objective:

To learn advanced database models and design of databases

ER Model - Normalization – Query Processing – Query Optimization – Transaction Processing
- Concurrency Control – Recovery - Database Tuning – Issues

Parallel Databases: I/O Parallelism – Inter and Intra Query Parallelism – Distributed
Database Features - Distributed Data Storage – Fragmentation – Distributed Query
Processing – Distributed Transactions – Commit Protocols – Concurrency Control – Recovery

Object Databases: Object Identity – Object structure – Type Constructors – Encapsulation of
Operations – Methods – Persistence – Type and Class Hierarchies – Inheritance – Complex
Objects – Object Database Standards, Languages and Design: ODMG Model – ODL – OQL –
Object Relational and Extended – Relational Systems: Object Relational features in
SQL/Oracle

Rules – Knowledge Bases - Active and Deductive Databases – Image databases –
Text/Document Databases - Multimedia Databases - Applications – XML Databases

Enhanced Data Models - Client/Server Model - Data Warehousing and Data Mining - Web
Databases – Mobile Databases – Location and Handoff Management – Mobile Transaction
Models

5. V.S.Subramanian, “Principles of Multimedia Database Systems”, Harcourt India Pvt Ltd., 2001.
6. Vijay Kumar, “Mobile Database Systems”, John Wiley & Sons, 2006.

Course Outcome:

Students will be able to:

1. Apply the principles of query optimization to a database schema
2. Design parallel and object database for real life application
3. Use distributed database management system

CA7B7 MODELING AND COMPUTER SIMULATION

Pre-requisites: CA707,CA713,CA719,CA723

Objective:

- To understand the techniques of random number generations and testing randomness.
- To design simulation models for various case studies like inventory, traffic flow networks, etc.
- To practice on simulation tools and impart knowledge on building simulation systems.

Simulation and Simulation Software - Systems – Models – Types, Components, Steps in Modeling –Simulation of statistical queuing, manufacturing and material handling

Useful Statistical Models – Discrete Distribution – Continuous Distributions – Poisson – Empirical Distribution – Manufacturing and Material Handling System – Models – Goals and Performances Measure – Issues – Queuing System – Characteristics – Transient and Steady-State Behaviour of Queues – Long-Run Measures – Infinite – Population Markovian Models

Random Numbers - Generation of Pseudo Random Numbers – Mid-Square Method – Linear Congruential Generators – Generating Random Variates from Continuous and Discrete Probability Distributions. System dynamics and object oriented approach in simulation

Generalization of Growth Models – System Dynamics Diagram – Decision Function – Multi Segment Model – Representation of Time Delays – Inventory and Flow Distribution Systems – World Model – Object Oriented Approach – Rule Based Approaches– Casual Loops – Flow Diagrams – Levels and Rates – Simple examples of Animation.

Analysis – Input – Output – Verification and Validation of Simulation Models – Comparison and Evaluation of Alternative System Design - Development of simulation models using simulation language.

2. Lawrence M. Leemis, Stephen K. Park, “Discrete-Event Simulation: A First Course”, Pearson Education, 2006

Course Outcome:

Students will be able to :

1. Practice simulation tools and build simulation systems
2. Assess the techniques of random number generations and testing its randomness
3. Design various simulation models for real time situation

CA7B8 BUSINESS PROCESSES MODELLING

Pre-requisites: CA722,CA725

Objective:

- Identify and model core business processes at an organisational level
- Identify and model business processes at the process level

Procedure for business process modelling - Identification, Modelling , Analysis , Improvement , Implementation and Control ; Approaches to business process modeling; hierarchy of business processes – organisation, process and task levels; differences between the process view and the functional view of an organization; advantages of the process view

Organisational model of processes - strategic context for business processes; Relationships between processes, including those at the same level and between levels of hierarchy ; Building an organizational view of processes; Delivering value to customers and the value proposition

Modelling the business processes - Selected business process modelling technique(e.g., ontology) - Notation – actors, tasks, process flows, decisions and Rules; Modelling as-is business processes; Events that trigger business processes; External business events and Internal business events; Time-based business events The outcomes from business processes; Timelines for business processes; Business process measures

Evaluating and improving business processes - Identifying problems with the as-is business processes Analysing the process flow; Analysing the tasks; Staff performance issues; Challenging the business rules; Modelling the to-be business processes; Approaches to business process improvement

Transition - Integration of business process modeling and requirements definition; Implementation issues - Approaches – pilot run, direct changeover, parallel ; Organisational design; Role definition; Staff development; Managing change implementation

REFERENCES:

1. Michael Havey, “Essential Business Process Modeling”, O'Reilly Media; 1 edition, 2005
2. Paul Harmon, “Business Process Change”, Morgan Kaufman Publication, 2nd Edition, 2007.

3. Metters, King-Metters, Pullman, Walton, "Business Process Management", Thomson; 1st Edition, 2008
4. Seppanen, Kumar, and Chandra, "Process Analysis and Improvement Tools and Techniques", McGraw Hill Irwin, 2005

Course Outcome:

Students will be able to :

1. Classify and analyze different types of business organization
2. Describe business process modeling
3. Visualize different business processes
4. Identify and solve issues related to Business Processes

ELECTIVES –C

CA7C1 HUMAN COMPUTER INTERACTION

Pre-requisites: CA723,CA716

Objective:

To learn the concepts (basic to advanced levels) of user oriented aspects of product designs (physical to software); providing in depth study on Human Centric and Human oriented features in developing systems.

Importance of user Interface – definition, importance of good design. Benefits of good design. A brief history of Screen design. The graphical user interface – popularity of graphics, the concept of direct manipulation, graphical system, Characteristics, Web user – Interface popularity, characteristics- Principles of user interface. Design process – Human interaction with computers, importance of human characteristics human consideration, Human interaction speeds, understanding business junctions

Screen Designing : Design goals – Screen planning and purpose, organizing screen elements, ordering of screen data and content – screen navigation and flow – Visually pleasing composition – amount of information – focus and emphasis – presentation information simply and meaningfully – information retrieval on web – statistical graphics – Technological consideration in interface design

Windows – New and Navigation schemes selection of window, selection of devices based and screen based controls. Components – text and messages, Icons and increases – Multimedia, colors, uses problems, choosing colors

Software tools – Specification methods, interface – Building Tools. Interaction Devices – Keyboard and function keys – pointing devices – speech recognition digitization and generation – image and video displays – drivers

HCI and related fields – Cognition Theory – A.I. – Accessibility Issues – Assistive Technologies – Technologies for HCI – Research Directions in HCI

REFERENCES:

1. Wilbert O Galitz, "The essential guide to user interface design", Wiley Dream Tech.
2. Ben Shneidermann, "Designing the user interface", 3rd Edition, Pearson Education Asia.
3. Alan Dix, Janet Finlay, Gregory Abowd & Russell Beale, "Human-Computer Interaction", 3rd Edition. Prentice Hall, 2004.

6. PRECE, ROGERS, SHARPS, "Interaction Design", WileyDreamtech.
7. SorenLauesen, "User Interface Design", Pearson Education

Course Outcome:

To enable students to understand HCI principles and practice them in product designs.

Industrial Component:

Providing exposure to HCI based software development products.

CA7C2 BIOINFORMATICS

Pre-requisite: CA7B5

Objective:

To understand Genomic data acquisition and analysis, comparative and predictive analysis of DNA and protein sequence, Phylogenetic inference etc.

Introduction to bioinformatics, classification of biological databases, Biological data formats, application of bioinformatics in various fields. Introduction to single letter code of amino acids, symbols used in nucleotides, data retrieval – Entrez and SRS

Introduction to sequence alignment, substitution matrices, scoring matrices – PAM and BLOSUM. Local and Global alignment concepts, dot plot, dynamic programming methodology, Multiple sequence alignment – Progressive alignment. Database searches for homologous sequences – FASTA AND BLAST versions

Evolutionary analysis: distances - clustering methods – rooted and unrooted tree representation – Bootstrapping strategies.

Fragment assembly-Genome sequence assembly - Gene finding method, Gene prediction - Analysis and prediction of regulatory regions.

Concepts and secondary structure prediction –Probabilistic models: Markov chain, Hidden Markov Models -Gene identification and other applications.

5. Doolittle R.F. (Ed.), “Computer methods for macromolecular sequence analysis Methods in Enzymology”, Academic Press, 1996

Course Outcome:

Students will be able to :

1. Describe user oriented aspects of product design
2. Analyze the screen designing principles
3. Apply HCI principles in product designs

CA7C3 MOBILE AND PERVASIVE COMPUTING

Pre-requisites: CA727,CA714

Objective:

To introduce the necessary concept of mobile communication system and pervasive computing.

Mobile Computing – Networks – Middleware and Gateways – Developing Mobile Computing Applications – Mobile Computing Architecture: Architecture for Mobile Computing – Three-Tier Architecture – Design Considerations for Mobile Computing

Global System for Mobile Communications – GSM Architecture – GSM Entities - Call Routing in GSM – GSM Addresses and Identifiers – Network Aspects in GSM – GSM Frequency Allocation – Authentication and Security -Mobile Computing through Internet –Mobile Computing through Telephone – Emerging Technologies: - Bluetooth – RFID -Wireless Broadband (WiMax) - Mobile IP

Short Message Service (SMS)- Value Added Services through SMS – GPRS- GPRS and Packet Data Network – GPRS Network Architecture – GPRS Network Operations –Data Services in GPRS- Applications for GPRS – Limitations of GPRS – CDMA and 3G- Spread Spectrum

Technology- CDMA Versus GSM – Wireless Data – Third Generation Networks – Applications on 3G

Pervasive Computing: Past, Present and Future Pervasive Computing - Pervasive Computing Market – m-Business – Application examples: Retail, Airline check-in and booking – Sales force automation – Health care – Tracking – Car information system – E-mail access via WAP

Device Technology: Hardware – Human Machine Interfaces – Biometrics – Operating Systems – Java for Pervasive devices

REFERENCES:

2. JochenBurkhardt, Horst Henn, Stefan Heper, Klaus Rindtorff and Thomas Schack, “Pervasive Computing Technology and Architecture of Mobile Internet Applications”, Addison Wesley, 2002.
3. UweHansmann, L. Merk, M. Niclous, T. Stober and U.Hansmann, “Pervasive Computing”, Springer Verlag,2003.

Course Outcome:

Students will be able to :

1. Analyze the architecture for Mobile computing platform
2. Identify and be able to use recent and advanced GSM architecture with emerging technologies
3. Explore, Evaluate different mobile computing methodologies
4. Apply the concepts of pervasive computing in real life problems

CA7C4 MULTI-CORE ARCHITECTURE

Pre-requisites: CA715,CA731

Objective:

To learn different multi-core programming techniques.

Multi-core – Definition and hybrid architectures – The software developer’s viewpoint – the bus connection – from single core to multi-core – Four effective multi-core designs

Challenges of multi-core programming – Sequential model – definition – Concurrency – Definition – challenges pertaining to software development – Processor architecture challenges – Operating system’s role

Process – Definition – Process creation – working with process Environment Variables – killing a process – process- resources- synchronous and asynchronous processes – Multithreading – Comparing threads to processes – Architecture of a thread- creation and management of threads

Communication and synchronization – synchronizing concurrency – Thread strategy approaches – Decomposition and encapsulation of work- Approaches to application design – PADL and PBS

UML – modeling the structure of a system – UML and concurrent behavior – Basic testing types – Defect removal for parallel programs – Standard software engineering tests

REFERENCES:

1. M. Herlihy and N. Shavit, “The Art of Multiprocessor Programming”, Morgan Kaufmann,2008.
2. D.B.Kirk and W.W.Hwu, “Programming Massively Parallel Processors: A Hands-on Approach”, Morgan Kaufmann,2010.
3. C.Huges and T.Huges, “Professional Multi-core Programming: Design and Implementation for C++ Developers”,Wrox, 2008.

Course Outcome:

Students will be able to:

1. List the features of multi core systems and assess the challenges of multi core programming
2. Apply process techniques
3. Identify the approaches to application design
4. Describe the communication and fine issues

CA7C5 MOBILE APPLICATION DEVELOPMENT

Pre-requisites: CA727,CA714

Objective:

To learn the concepts mobile technologies; develop and deploy effective mobile applications.

The Mobile Ecosystem: Operators - Networks - Devices - Platforms - Operating Systems - Application Frameworks - Applications - Services

Mobile Devices Profiles - Options for development - Categories of Mobile Applications: SMS - Mobile Websites - Mobile Web Widgets - Native Applications - Games - Utility Apps - Location Based Services(LBS) Apps - Informative Apps - Enterprise Apps

Mobile Information Architecture: Introduction - Sitemaps - Click Streams - Wireframes - Prototyping - Architecture for Different Devices. Mobile Design: Interpreting Design - Elements of Mobile Design - Mobile Design Tools - Designing for Different Device/ Screens

J2ME Overview -J2ME Architecture and Development Environment- Small Computing Device Requirements, Run-Time Environment, MIDlet Programming, Java Language for J2ME, J2ME SDK, J2ME Wireless Toolkit

Google Android: Introduction - Android Development Environment- Development Framework- SDK, Eclipse - Emulator, Android AVD - Project Framework - Apple IOS - RIM Blackberry - Samsung Bada - Nokia Symbian - Microsoft Windows Phone.

REFERENCES:

1. Mobile Design and Development by Brian Fling, O'Reilly Media, Inc 2009
2. J2ME: The Complete Reference, James Keogh, Tata McGrawHill, 2003
3. Smart Phone and Next-Generation Mobile Computing by Pei Zheng and Lionel Ni, Elseveir,2006
4. Beginning Android by Mark L. Murphy , Apress, 2009

Course Outcome:

Students will be able to :

1. Describe the basic concepts of Mobile ecosystems
2. Develop various mobile applications
3. Analyse the various mobile information architecture
4. Use JME development environment to develop applications

CA7C6 BIG DATA MANAGEMENT

Pre-requisites: CA712, CA721, CA726

Objective:

To gain ability to design high scalable systems.

Big Data – Unstructured Data - Introduction to data analytics, big data analytics, big data management

Data Management Techniques: Storage of large data – Analyze of large data –Extraction of business relevant, social relevant information

Columnar databases - Map Reduce as a tool for creating parallel algorithms -Processing very large amounts of data.

Big Data applications -Columnar stores -Distributed databases -Hadoop -Locality Sensitive Hashing (LSH) -Dimensionalityreduction -Datastreams -Unstructureddata processing, NoSQL-NewSQL

Mining massive datasets - Socio-Business intelligence using big-data

REFERENCES:

1. Michael Minelli, Michele Chambers, AmbigaDhiraj ,“Big Data, Big Analytics”, John Willey , 2013
2. Chris Eaton, Dirk Deroos, Tom Deutsch, George Lapis, Paul Zikopoulos, “Understanding Big Data: Analytics for Enterprise Class Hadoop and Streaming Data”, Tata McGraw Hill Education, 2012

Course Outcome:

Students will be able to:

1. Explain the concepts of big data analysis
2. Identify the various Big data management, processing techniques
3. Analyse performance of big data analysis in Hadoop environment

CA7C7 EVOLUTIONARY COMPUTING

Pre-requisites: CA7B5, CA719

Objective:

To provide evolutionary Computation and global optimization techniques.

Evolutionary computing: Biological foundation of Evolutionary computing, Introduces evolutionary algorithms, a class of stochastic, population-based algorithms inspired by natural evolution theory, capable of solving complex problems for which other techniques fail

Genetic Algorithms (GA): Biological foundation of GA, General steps in GA, Genetic Operations: cloning, crossover and mutation, Encoding and Selection techniques, Mathematical foundation and Schemata, Holland Schemata theorem, design and implementation of GA, issues in implementation of GA, applications of GA, Classifier systems, Genetic programming, new trends in GA. Applications of GA

Swarm Intelligence (SI): Biological foundation of SI, SI Techniques: Ant Colony Optimization (ACO) and Particle Swarm optimization (PSO). General steps in ACO, the "Invisible Manager" (Stigmergy), the Pheromone, Ant Colonies and Optimization, Ant Colonies and Clustering, Applications of Ant Colony Optimization. Applications of ACO

PSO: Social Network Structure: The Neighborhood Principle, PSO Algorithm, Fitness Calculation, Convergence, PSO System Parameters, Particle Swarm Optimization versus Evolutionary Computing and Applications of PSO

Mimetic algorithm, Firefly Algorithm, multi objective algorithms

REFERENCES:

1. M. Mitchell, An introduction to Genetic Algorithms, Prentice-Hall, 1998.
2. D. E. Goldberg, "Genetic Algorithms in Search, Optimization, and Machine Learning," Addison Wesley, 1989.
3. R. Eberhart, P. Simpson and R. Dobbins, Computational Intelligence - PC Tools, AP Professional, 1996.

Course Outcome:

Students will be able to:

1. Describe the Evolutionary algorithms and solve complex problem using evolutionary algorithms
2. Identify the issues in design and implementation of genetic algorithm
3. Explain the concepts of Swarm Intelligence techniques
4. Describe the social network structure

CA7C8 SOCIAL NETWORK ANALYSIS

Pre-requisites: CA710, CA721

Objective:

To introduce the concepts and methods of social network analysis.

Social network concepts – Development of social network and analysis - Online social networks – Social Network Data - Issues and challenges

Linked-based and structural analysis - Content-based analysis - Static and dynamic analysis
Mathematical Representation of social networks

Social networking systems and API - Statistical Analysis of Social Networks- Community Detection in Social Networks - Node Classification in Social Networks - Evolution in Dynamic Social Networks

Social Influence Analysis - Link Prediction in Social Networks - Data Mining in Social Media
Text Mining in Social Networks - Social Tagging - Building social services

Tools for Social network analysis: UCINET – PAJEK– NETDRAW – StOCNET - SPlus - R – NodeXL- SIENA and RSIENA - Real-world networks (Facebook graph, Twitter networks, etc.)

REFERENCES:

1. Christina Prell, Social Network Analysis: History, Theory and Methodology, SAGE Publications Ltd, Publication Year 2011
2. David Easley and Jon Kleinberg, “Networks, Crowds, and Markets: Reasoning About a Highly Connected World”, 2010
3. Stanley Wasserman and Katherine Faust, “ Social Network Analysis: Methods and Applications”, Cambridge University Press, 1994
4. Carrington and Scott (eds). The SAGE Handbook on Social Network Analysis SAGE, First Edition 2011

Course Outcome:

Students will be able to :

1. Describe the issues and challenges in social network functions
2. Mathematically represent social networks for analysis
3. Use various tools for social network analysis
