GUIDELINES

ATTACK WINDOW: 9.00 A.M. – 12.00 NOON

I. *Attack Environment is as follows:*

- Target machine with vulnerable services running
- Internet access not available in the lab
- You are free to get any software/tools
- You may bring your own laptop also
- Few systems are available to launch the attack(s)
- You may use your own attack code/tools
- You can come in batches (2 to 3)
- A time window of 20-30 minutes available for each batch
- IP address will be given at the start of the session
- Fill up the "Vulnerability Exploitation Report" and hand over to the coordinator

II. *Attack Procedure*

- Enter the SSE lab (with your laptop and necessary tools)
- You can use any one of the lab machines or your laptop by connecting to lab network.
- Start an attack on the given target
- Inform coordinators when you accomplish an attack and demonstrate the results.
- Fill up "Vulnerability Exploitation Report" and hand over to the coordinator before leaving the lab
