I am a proud Indian and I am very passionate about teaching and doing research. This is why I switched my profession from corporate to academia. I enjoy interacting with students. I constantly explore ways to improve my lectures to make them interactive, enjoyable and effective. My course evaluation criteria are generally competitive and tough, pushing students to be more committed to the course. I do this to ensure that students not only learn to work in a competitive environment, but also get the opportunity to overcome obstacles and failures.

My research interest is in the areas of Operations Management, Applied Data Analytics, Industry 4.0 and Sustainable Environment Policies. Therefore, I primarily focus on application of data for solving business and social problems which results in both resource savings and economic benefits.

I strongly believe that self-belief can overcome any obstacle and my two most favorite quotes are the following

"Man is made by his belief. As he believes, so he is" - Bhagavad Gita (17:03)

"Nothing is impossible in life. Awake, arise and stop not till the goal is achieved" - Swami Vivekananda
