

## Sustainability Awareness Quiz for Staff- Result Analysis

No. of respondents vs. Marks

The sustainability awareness assessment among staff indicates a **very strong overall level of understanding**. Across the ten questions, the average performance was approximately **9.8 out of 10**, with a median score of 10, showing that most respondents answered nearly all items correctly. The distribution is heavily concentrated at the top end, with only a small number of incorrect responses overall.

Question-wise analysis shows that several items achieved **perfect correctness (100%)**, including **water conservation (Q3)**, **waste segregation (Q5)**, **green procurement (Q7)**, **paper reduction (Q9)**, and **tree planting benefits (Q10)**. Other questions also performed very strongly: **reduce, reuse, recycle (Q1)**, **energy-saving practice (Q2)**, and **carbon footprint (Q8)** each recorded **98.6%** correctness, while **biodegradable waste (Q4)** reached **97.2%**.

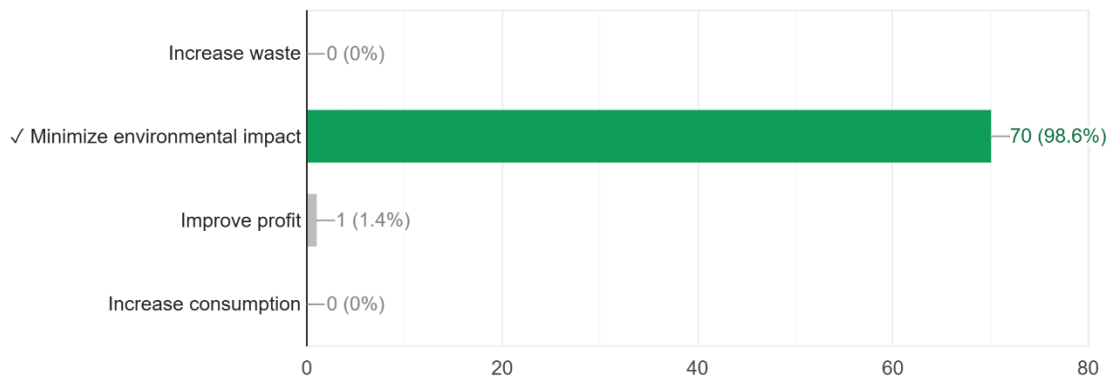

The comparatively lowest-performing item was **Q6: reducing carbon footprint**, with **65 of 71 respondents (91.5%)** selecting the correct answer. This suggests a small degree of confusion between everyday transport choices and broader emissions reduction strategies. Even so, the error rate remained limited, and no question showed a major drop in performance.

Overall, the results suggest **solid foundational awareness**, with minor gaps concentrated in a small number of concept-based questions rather than in practical sustainability behaviors.

### Question-wise distribution of correct response:

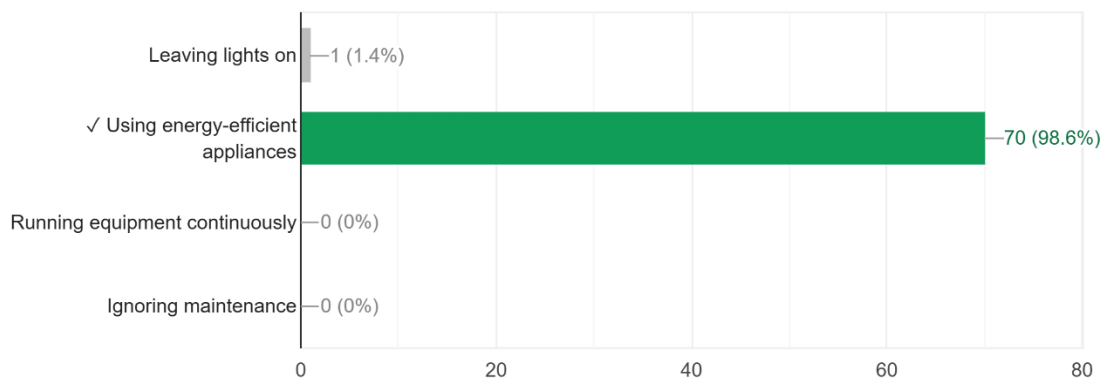

What does "reduce, reuse, recycle" aim to achieve?

70 / 71 correct responses

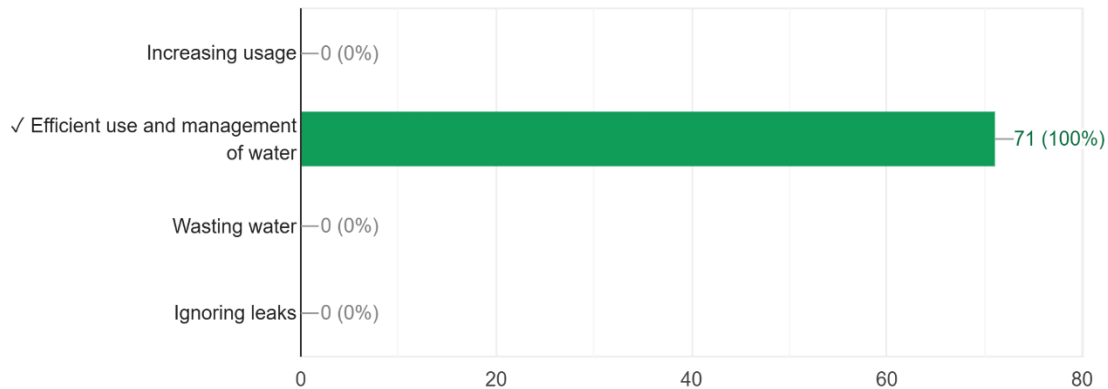

Which of the following is an energy-saving practice?

70 / 71 correct responses

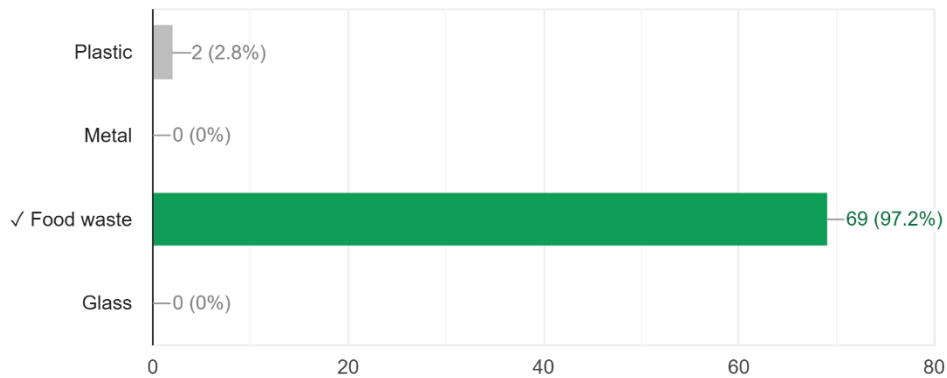

### What is water conservation?

71 / 71 correct responses

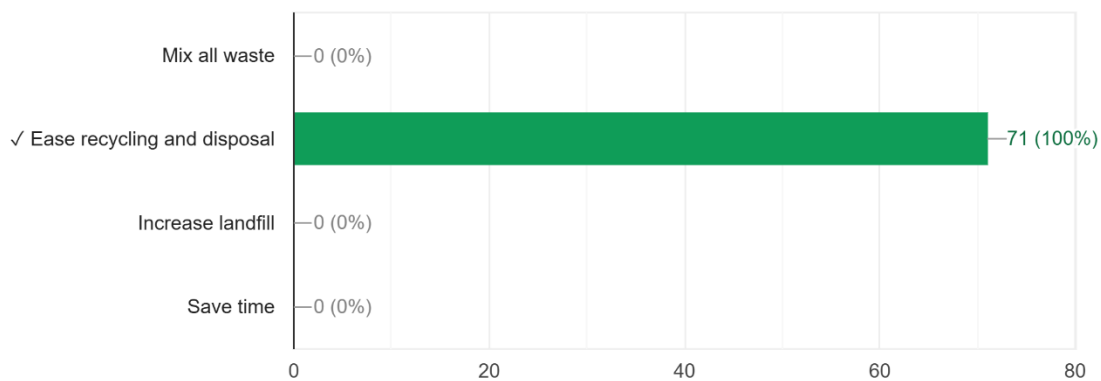

### What type of waste is biodegradable?

69 / 71 correct responses

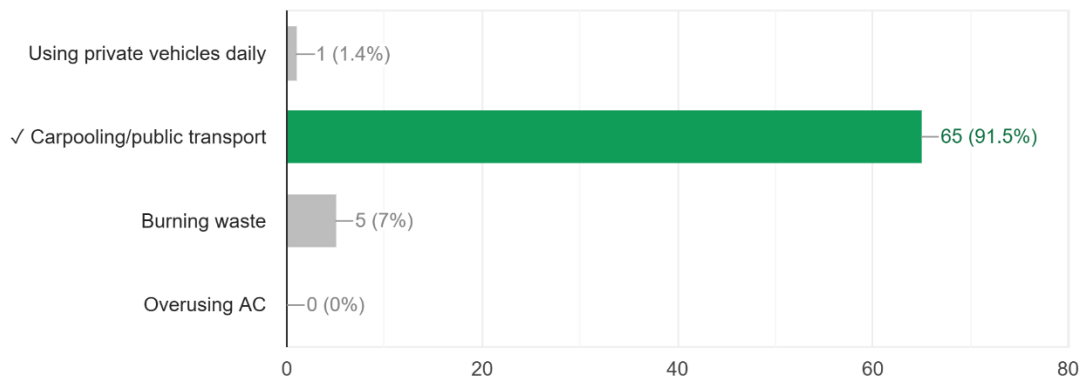

### What is the purpose of waste segregation?

71 / 71 correct responses

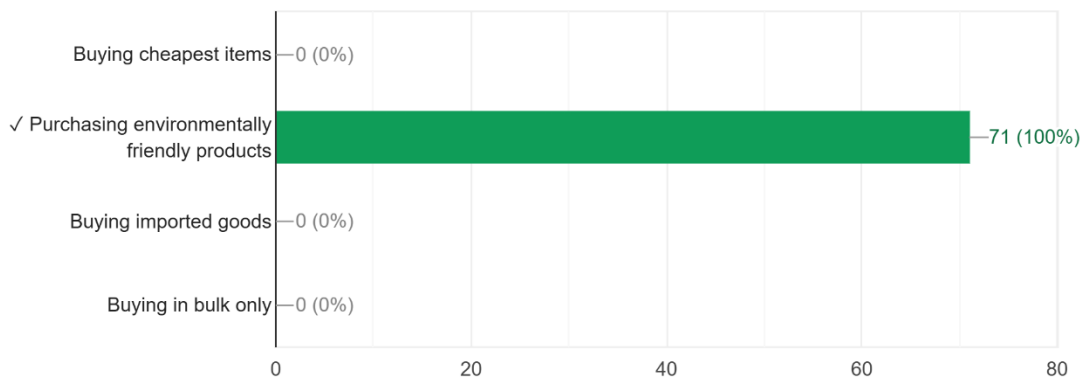

Which of the following reduces carbon footprint?

65 / 71 correct responses

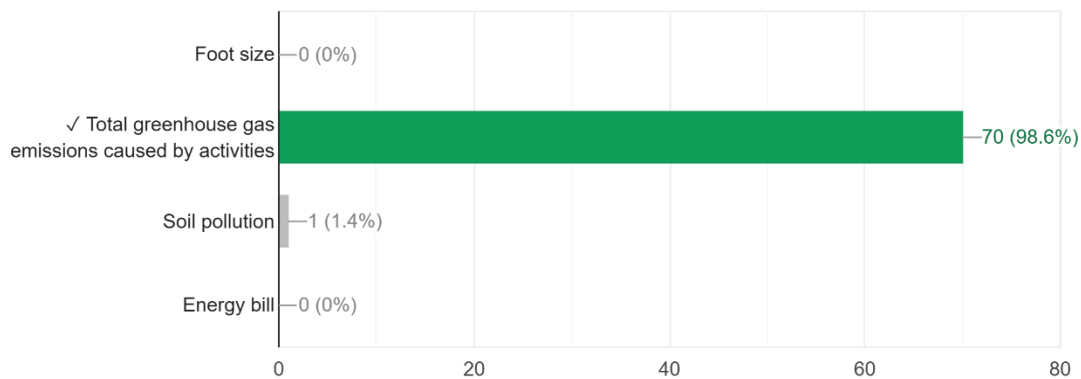

What is green procurement?

71 / 71 correct responses

What does "carbon footprint" mean?

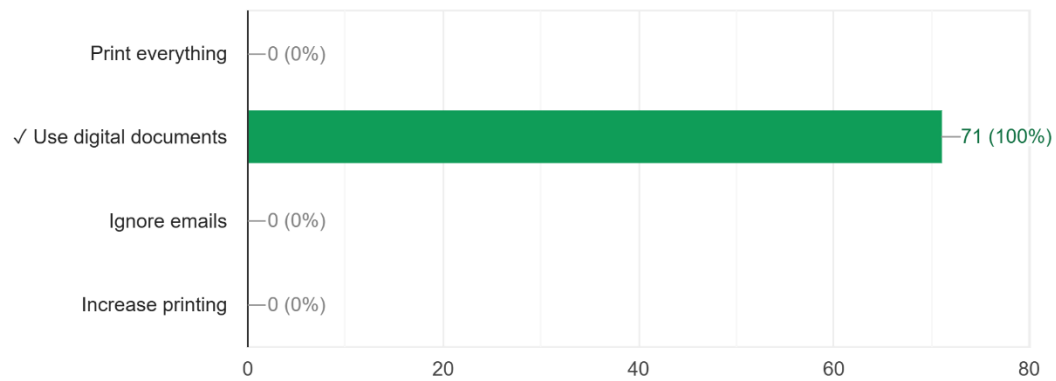

70 / 71 correct responses

### How can offices reduce paper usage?

71 / 71 correct responses

### What is the benefit of planting trees on campus?

71 / 71 correct responses
